NM Art Furniture Sample Price List

The objects listed below represent a cross-section of Nikolai Moderbacher's work in the field of Art Furniture. Each piece is one-of-a-kind, and was commissioned by a variety of clients to fit loosely specified needs. As you can tell, Nikolai's art encompasses a multiplicity of forms and functions, creating everything from cradles and flower vases to chairs and jewelry cases.

All pieces shown have a few key ingredients in common; first and foremost is the artistic vision of Nikolai himself. His work is simultaneously old and brand-new, using raw, recycled materials such as forklift palette wood and reworking them into striking, fresh forms and innovative functions. While he respects the conventions of traditional woodworking and craft, Nikolai is more concerned with the process of creation itself. He often works "from the ground up", letting the material direct him joint by joint to the most visually stunning result.

Nikolai works on commission. All prices shown below are retail.
